

Designed for Automation

High-Precision Weighing Platforms

Smart Weigh Module Technology

The weigh module, with Monobloc technology, is at the core of the PBK-Series weighing platforms and guarantees the highest precision and reliability. A robust weigh module housing features integrated overload protection and durable mechanical interfaces. This ensures stable weight values for many years of intensive use.

High Resolution

PBK weighing platforms have a resolution up to 750'000 points. With this high precision, it is possible to measure even the slightest change in the weight; thus unnecessary waste can be minimized and cost savings realized by optimizing the material quantity.

Connect to PLC

All weighing platforms can easily be connected to METTLER TOLEDO transmitters for easy integration into automated environments. This allows machine builders to standardize on PBK weighing platforms for weighing connected to PLC systems.

Hazardous Environments

When working in a hazardous environment, safety is key. The PBK weighing platforms are approved for the use in hazardous areas for category 2 and 3 as well as FM division 1 and 2 for top performance in gaseous and dusty environments.

PBK9-APW Bench Platforms

Accurate – Reliable – Robust – Versatile

Accurate weighing helps you manage raw materials, ensure compliance with regulations and improve your product quality. For bench scale applications that require reliability with the best accuracy available, the PBK9 weighing platforms provide industry-leading performance. The wide range of platforms with nine nominal capacities from 3 to 300 kilograms in four different sizes makes it suitable for a variety of applications and industries. The PBK9 Weighing platforms provide benefits such as

- Up to 750'000d resolution
- Directly connects to control systems
- Increases speed of filling processes with up to 92 updates per second
- For safe as well as hazardous areas category 3 / division 2 and category 2 / division 1
- IP66/IP68 ingress protection
- Minimizes downtimes by checking the platform periodically with the internal weight

Resolution (The resolution is dependent on the weighing platform model.)

Non-approved, 1 x 60'000d / 1 x 75'000d	Standard	•	•	•	•
Non-approved, 1 x 300'000d / 1 x 240'000d	Option	•	•	•	•
Non-approved, 1 x 600'000d / 1 x 750'000d	Option	•	•	•	•

Temperature range

Non-approved application					
In operation	-20 °C to 60 °C (-4 °F to 140 °F)		•	•	•
In operation cat. 2 div. 1	-10 °C to 40 °C (14 °F to 104 °F)		•	•	•
For storage	-20 °C to 70 °C (-4 °F to 158 °F)		•	•	•

Warm-up time (dependent on resolution)

Typically 30 min.

Scale interfaces

RS232, RS422	MT – SICS command set	Standard	•	•	•
--------------	-----------------------	----------	---	---	---

Cable length

Safe area: cable M12, 12-pin – open leads, 10 m	Option	•	•	•	•
Cat. 2 / div. 1: cable M12, 6-pin, 5 m, 10 m, 20 m	Option	•	•	•	•
Cat. 3 / div. 2: cable M12, 12-pin – open leads, 10 m	Option	•	•	•	•

Model designation examples:

PBK989APW-AB15 Bench platform with frame in stainless steel, direct connectivity version, AB-size (280 mm x 350 mm), nominal capacity 15 kg

PBK987APW-CC300 Bench platform with frame in mild steel powder coated, direct connectivity version, CC-size (600 mm x 800 mm), nominal capacity 300 kg

¹⁾ In the hazardous area, you can use powder coated platforms only if intense electrostatic charges do not accumulate on the platform during the application or process.
